A balanced diet is fundamental to brain health. The right foods don't just fuel our brain cells, they also boost the flow of blood, oxygen and nutrients to the brain and reduce potentially harmful inflammation.

When feeding the brain, and ourselves, the Global Council on Brain Health (GCBH) suggests we divide foods into three groups. These groups broadly mirror the recommendations in diets such as the Mediterranean diet, the DASH diet, and the MIND diet (read more about these in the nutrition pillar).

Foods to be Eaten Regularly

Fresh Fruits

Healthy Fats

Fresh Vegetables

Nuts

Fish & Seafood

Foods to Include in Your Diet

Beans/Legumes

Poultry

Fruits

Whole Grain

Foods to Limit

Fried Food, Pastries, and Processed Food

Red meat and Related Products

Whole Fat Dairy

Excessive Salt Intake
